

# ATS 04

## Air Temperature Sensor

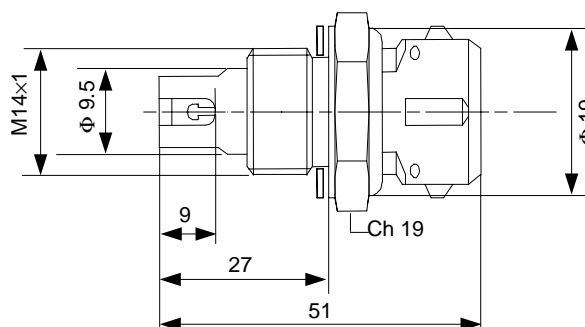

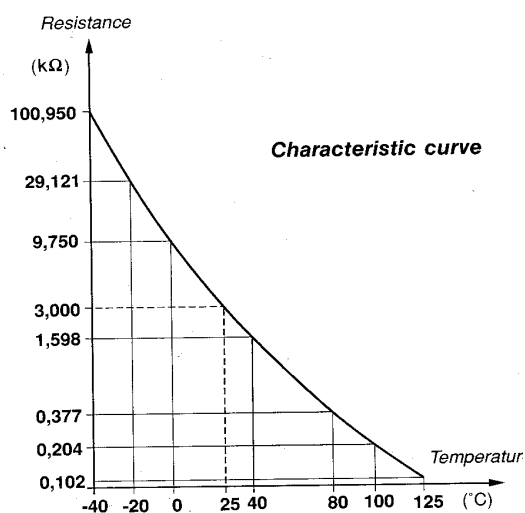

The ATS 04 is an analogue sensor with a temperature dependent resistor that provides a variable resistance signal with negative coefficient (NTC).

The active device is a thermistor fitted with coated leads in a plastic protective casing.

### Technical data

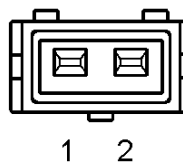

#### Electrical Characteristics

Resistance .....3 kOhm @ 25°C  
Maximum input voltage .....5 V (series)  
Accuracy from nominal values ..... 5% @ -40 +125°C  
Weight .....25 g

### Connector Pin Out ( minitimer 2 ways )

Connector Pin-Out	
PIN 1	NTC LEAD
PIN 2	NTC LEAD

### Ordering Information

Description	Order code
ATS 04 Air Temperature Sensor	083800241000
